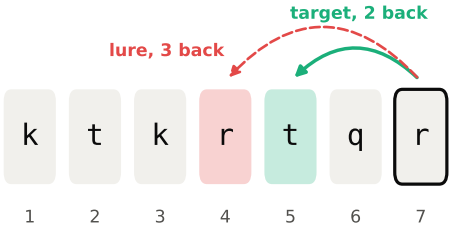
a 2-back with a lure



query: "r" answer: no match ("t" is 2 back)
lure: an "r" sits 3 back

b Two accounts of an error

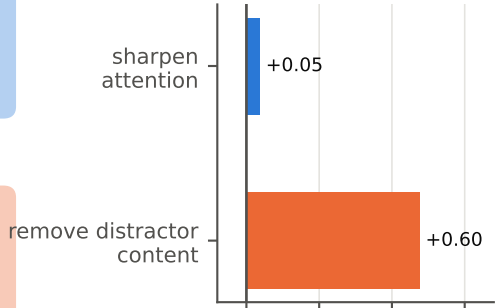
Locating failure (precision)

softmax attention spreads over near positions; the lure is read

fix: sharpen attention

Readout failure (interference)

attention lands on the target; other items' content corrupts the readout

fix: remove distractor content


c The answer: readout
